

# STRENGTHENING UNICEF'S TECHNICAL AND HUMAN CAPACITIES IN THE FORMULATION, DEVELOPMENT, AND USE OF INFORMATION PRODUCTS FOR OPPORTUNE AND ACCURATE DECISION-MAKING

## CONTEXT

Colombia

Since 2018, the National Government requested support and technical cooperation from the United Nations System in Colombia, in order to join efforts to address the emergency arising from the mixed migratory flow of Venezuelan population. UNICEF has focused its support on an Annual Response Plan (HAC)

Furthermore, the current challenges posed by multi-affecting emergencies (armed conflict and natural disasters) demonstrate the need for a comprehensive HAC that responds to the specific needs of the territory. In the development and implementation of this plan, UNICEF has identified the need to consolidate, utilize, and analyze information to plan and report on actions, as well as to strengthen coordination mechanisms at both national and territorial levels, and transfer methodologies and tools to the involved stakeholders.

In this regard, 3iSolution has been assisting the country office in strengthening its information management processes, resulting in more timely and high-quality information products for its response plan. This collaboration has also helped prioritize key issues related to the situation of children and adolescents at both national and territorial levels and optimize processes for reporting on UNICEF's humanitarian response and its implementing partners.

## OBJECTIVE

Strengthen UNICEF's technical and human capacities in the formulation, development and use of information products for opportune and accurate decision-making in accordance with the national and territorial context.

## EXPECTED RESULTS

- Strengthening coordination mechanisms led by UNICEF for emergency response.
- Analyzing and using information for the planning and reporting of UNICEF's humanitarian actions.

**Project Donor:**  
UNICEF

**Current project:**  
Strengthening UNICEF's technical and human capacities in the formulation, development, and use of information products for opportune and accurate decision-making

**Budget:**  
USD 767,944

**Duration of project:**  
1 May 2023 – 31 Jun 2024

## TEAM:

**Total staff: 21**

- Female
- Male

## SERVICES

- **Strengthening the implementation and management of information** for the Local Coordination Team of La Guajira.
  - **Supporting the implementation and management of opportune information** for the inter-agency planning of the clusters/sectors led by UNICEF (Education in Emergencies, WASH, and Child Protection).
  - **Strengthening the Local Education Groups** (GLE - for its acronym in Spanish) in the implementation, analysis and use of information for planning, execution and monitoring of the sector's response.
  - **Strengthening the monitoring function** of children's and adolescents' rights situations with national and territorial offices.
  - **Providing support in implementing and managing information** within the context of sudden-onset emergencies, including standardizing processes for data collection and analysis, as well as needs assessment.
- Offering technical assistance** to UNICEF's
- humanitarian response planning and reporting mechanisms.
- Transferring methodologies and tools** for implementing and managing information during decision-making processes to UNICEF, partners, and allies.
